## EDUCATION

2025

### MASTER OF SCIENCE, GIS

University of Arizona

GPA: 4.00

2007

### MASTER OF ARTS, ARCHAEOLOGY

University of New Mexico

GPA: 4.03

1991

### BACHELOR OF ARTS, ANTHROPOLOGY AND HISTORY

University of Alabama

## SKILLS

- ESRI ArcGIS Pro
- ESRI ArcMap
- QGIS
- R Scripting
- Python Scripting
- Internet Mapping
- Total Station Mapping
- Trimble Data Systems Software
- Use of Garmin GPS Units

# William T Brown

GIS ANALYST

ARCHAEOLOGICAL CARTOGRAPHER

## PROFILE

GIS professional with extensive experience applying geospatial technologies to archaeological and historical research and land surveying. I'm a Registered Professional Archaeologist and have conducted total station mapping of prehistoric and historic sites all over the US, Spain, France, and Belize. I have worked as a GIS analyst/technician on several projects since 2022. Skilled in ArcGIS Pro, ArcMap, QGIS, ESRI software, and Trimble Data Systems SurveyPro surveying software, with a proven track record of producing high-quality spatial data.

## EXPERIENCE

*Jan 10-Apr 10, 2025*

School of Geography, Development, and Environment | University of Arizona

### GRADUATE TEACHING ASSISTANT

Graduate teaching assistant for an advanced undergraduate GIS course (GIST 420: Advanced GIS) taught by Dr. Craig Wissler. My work included grading lab assignments, discussions, and answering students' questions.

*May 15-Nov 20, 2024*

Division for Late Medieval and Reformation Studies | University of Arizona

### GIS ANALYST

Developed a geospatial dataset and created an interactive historical map of Catholic and Protestant churches in the Holy Roman Empire circa 1648 using ArcGIS Pro. Responsibilities included georeferencing a historical map source, digitizing spatial features, and standardizing attribute data to support ongoing research led by Dr. Beth Plummer (Department of History/Medieval Studies). This work contributed to the Shared Churches Project, which investigates religious coexistence and territorial dynamics in early modern Central Europe.

*May 1, 2022- Mar 20, 2025*

Interior West Consulting | P.O. Box 239 Dolores, CO

### GIS ANALYST

GIS analyst managing geospatial data for multiple archaeological surveys throughout the states of Colorado, New Mexico, and Wyoming. My work included processing GPS field data, querying NMCRIS (New Mexico Archaeological/GIS database) and OAHP Compass (Colorado archaeological and GIS database), using ArcMap and ArcGIS Pro to create and manage geodatabases, creating GIS layer files for the San Juan National Forest, and preparing 200-300 plan maps and project location maps for reports submitted to various federal agencies.

*1991-2013*

Various Employers

### MAPPING/ARCHAEOLOGICAL CREW CHIEF

From 1991 to 2013, I served as an Archaeologist/Mapping Crew Chief on numerous projects across the American Southwest (including at Pueblo Bonito in Chaco Canyon), the Plains, northwestern Belize, northern Spain, and southern France. In these roles, I:

- Mapped prehistoric Pueblo sites, Jornada Mogollon villages, Late Classic Maya residences, and Upper Paleolithic deposits using Topcon, Leica, Nikon/TDS, and Sokkia/TDS total stations.
- Supervised and trained teams of professional crews and graduate students in field mapping techniques, plan/profile drawing, and data recording
- Coordinated with archaeological field directors, cultural resource management firms, and university-sponsored research teams on projects of varying complexity, from small-scale feature mapping to large-scale excavations.
- Created topographic maps of prehistoric and historic sites, including prehistoric Pueblos, Spanish Colonial-era plazas, and cave sites with Neanderthal, Solutrean, and Magdalenian deposits.

*Feb 05-Apr 10, 2003*

Maness and Associates | Cortez, CO

### SURVEY INSTRUMENT MAN/ROD MAN

Instrument man for a PLS (Ernie Maness) running a Sokkia total station on several land surveying projects around Cortez, CO, including land title surveys, right-of-way stakeouts, etc.

*Jan 15-Oct 12, 1998*

CAJE Engineering | Cortez, CO

### SURVEY INSTRUMENT MAN/ROD MAN

Instrument man for CAJE Engineering running a Sokkia total station on several land surveying projects around Montezuma County, CO, including land title surveys, right-of-way stakeouts, etc. This work included establishing a traffic intersection at County Road G in Cortez, CO, slope staking, and performing bench loops (Rich Feit, Party Chief).
