EDUCATION

The University of Arizona

Master of Science, Geographic Information Systems (GIS)
GPA: 4.00

The University of New Mexico

Master of Arts, Anthropology
Concentration: Archaeology
GPA: 4.03

The University of Alabama

BA, Anthropology and History

SKILLS

- Over 30 Years of Excavation Experience
- **Burial Excavation** (Excavated over 250 Burials)
- **Human Osteology** (Analysis of 302 Burials from Woodland/Mississippian, Maya, Ancestral Puebloan, Roman, Neanderthal, and US Historic)
- **Faunal Analysis** (Eleven faunal analyses, mostly from the Southwestern US)
- **Total Station Mapping** (Mapped over 100 with various EDM setups)
- **GIS** (Managed databases and drafted roughly 150 plan maps)
- **Artifact Photography**

EXCAVATION HIGHLIGHTS

Ancestral Pueblo: 54 sites (BMIII - PIV) in Colorado, New Mexico, and Arizona, including at Pueblo Bonito/Chaco Canyon

Classic Maya: Supervised the excavation of eight sites in NW Belize

Mississippian: Moundville AL, and other sites in Alabama

Old World Paleolithic: France and Spain

Roman: Germany and the Netherlands

Historic Cemeteries: Huntsville, AL, Phoenix, AZ, and Albuquerque, NM

PROFILE

Bill Brown, M.A., M.S., RPA

Archaeologist | GIS Professional | Osteologist

Professional archaeologist with over 40 years of field and research experience across the United States and internationally, and masters degrees in Archaeology from the University of New Mexico and GIS from the University of Arizona. As a Registered Professional Archaeologist who meets the Secretary of the Interior's Professional Qualifications Standards, I have directed and/or participated on excavations for 19 cultural resource management (CRM) firms and seven leading universities and research institutions. My career spans complex data recovery and excavation projects in the U.S., Belize, the Netherlands, Spain, Germany, and France. I have led and contributed to excavations/lab analyses at over 50 Ancestral Pueblo sites—from Basketmaker III through Pueblo IV periods—including the iconic Pueblo Bonito in Chaco Canyon. My Southwestern experience also includes excavations at Jornada Mogollon, Sinaguan, Hohokam, and Archaic sites. I've directed excavations and lab analyses at Early-Late Classic Maya residential sites in Belize including at Lamanai, and participated in excavations at Mississippian centers such as Moundville (AL), Woodland villages in the Hudson Valley, NY, Late Prehistoric sites in the Great Plains, Neanderthal and Magdalenian cave sites in France and Spain, Roman sites in the Netherlands and Germany, and multiple historic sites in the U.S. including three cemeteries.

Areas of Specialization:

- **Human and Faunal Osteology:** Excavated over 250 human burials, analyzed more than 300 individuals, and conducted 10+ faunal assemblage analyses.
- **Total Station/EDM Mapping:** Created high-precision maps for over 100 archaeological sites using various total station and EDM configurations.
- **GIS and Spatial Analysis:** Drafted approximately 150 GIS-based plan maps, contributing to predictive modeling, settlement pattern studies, and landscape analysis.
- **Artifact Photography:** Produced hundreds of publication-quality artifact and site photographs for research and compliance reporting.

WORK EXPERIENCE

GIS Analyst/Lab Manager

Interior West Consulting | June 2022-February 2025

June 2022-Dec 2023: Responsible for data entry, report preparation, and GIS processing/map making for the Rocky Mountain Restoration Initiative Class III Cultural Survey, San Jan National Forest, Dolores Ranger District near Dolores, CO and the 2023 Fuels Treatment Project Class III Cultural Survey, White River Field Office, Moffat and Rio Blanco Counties, CO. I also co-authored three Class III survey reports, managed the field forms/data, completed Colorado OAHP site forms and isolated find forms, etc, managing GIS data, and preparing maps.

Dec 2023-Feb 2025: Data entry, report preparation, and GIS processing/map making for the BlackHawk Frances Creek Take-Out and Lay Flat Hose, La Jara Permanent Water, and Cabresto Loop projects in Rio Arriba County, NM. This work included completing Laboratory of Anthropology site forms, accessing GIS and archaeological data on NMCRIS, managing field forms/data, making report and site plan maps, and assisting with report preparation (Mark Lowe, Project Archaeologist/supervisor).

Crew Chief

Maya Research Program | May 22, 2008-August 1, 2013

From May 2008-August 2013, I served as a Project Archaeologist and Senior Bioarchaeologist for the Maya Research Program near the modern town of Blue Creek in northwestern Belize. During this time I was responsible for:

- Supervision of between 20-50 professional archaeologists, student volunteers, and local excavators on the excavation of eight Early-Late Classic Maya elite residences. I was responsible for excavation strategy, maintaining all the paperwork, overseeing the photography, total station mapping, and teaching student volunteers in basic excavation and laboratory methods.
- Authoring seven chapters for the end of the season excavation report submitted to the National Institute of Culture and History (NICH), Belmopan, Belize.
- As the Senior Bioarchaeologist I oversaw the excavation of approximately 90 human burials, the analysis of 104 burials from various sites, preparation of roughly 80 stable isotope samples, and served as the primary author on six osteological chapters submitted to NICH, Belmopan, Belize. Also I instructed a two-week long school on bioarchaeology and gave several lectures on the bioarchaeology of Maya sites in the Blue Creek region.
- Total station mapping of approximately 10 Maya sites (Dr. Thomas Guderjan, PI).

Crew Chief

SWCA, Inc (Albuquerque Office) | May 18, 2007-January 20, 2008

During this time I served as the excavation Crew Chief for SWCA on the Highway 53 Expansion Project. I was responsible for supervising the excavation of a multi-component prehistoric Pueblo pit house village roughly two miles east of El Morro National Monument, Cibola County, NM. This work included devising excavation strategy, supervising the excavation of two pit houses, three human burials, site mapping with a Nikon total station, and finally the write-up of the final excavation report (Dr. Rebecca Schwendler, Principal Investigator).

Crew Chief

University of New Mexico/Office of Contract Archeology (UNM/OCA) | June 30, 2003-July 9, 2007

I worked as a Crew Chief/Crew Member on several projects for OCA and/or the University of New Mexico during this time, including:

- **May 14-28, 2007:** Excavation of a Pueblo IV field house on the West Mesa area of Albuquerque, NM (Robin Cordero, Project Director).
- **Aug 3 2006-May10, 2007:** Write-up of various outstanding reports for OCA, including AFCOP and MAPL (Dr. Richard Chapman, Principal Investigator).
- **June 23-July 31, 2006:** Field archaeologist for UNM on the El Miron Archaeological Project in northern Spain. This work consisted of the excavation of Upper Paleolithic strata (terminal Solutrean-early Magdalenian) in a cave near Ramales, Spain. My work included piece plotting roughly 2000 artifacts with a total station and excavating grid squares (Dr. Lawrence Straus and Dr. Manuel Gonzalez Morales, Principal Investigators).
- **May 1-June 20, 2006:** Crew Chief for OCA on the MAPL data recovery project. I supervised the excavation of seven archaeological sites in central New Mexico ranging in age from Archaic to Historic (Dr. Richard Chapman, Principal Investigator).
- **Nov 2-May 2006:** Project Director for OCA on the Alameda Area D Data Recovery Project, Alameda, NM. This work included overseeing the write-up of a large historic site and historic Hispanic cemetery (see below for the description of the field work). My responsibilities included conducting the faunal analysis, assisting in the analysis of human remains, writing various permit requests to NM CPRC, authoring the post-field report on the 2003-2004 phase of field work, budget planning, as well as coordinating the backhoe, utility line location, and acquiring safety permits from Bernalillo County, NM (Dr. Richard Chapman, Principal Investigator).
- **Aug 15-Oct 30, 2005:** Write-up of the Alamogordo Flood Control Data Recovery Project. During this time I was responsible for conducting the faunal analysis from a Dona Ana phase settlement in Alamogordo, NM, as well as write-up of the excavation results (see below for the description of the field work).
- **July 19-Aug 10, 2005:** Crew Chief for OCA on the MAPL auger testing project in the southeast and northwest BLM permit areas in New Mexico. During this time I oversaw the total station mapping of eleven archaeological sites ranging in age from Archaic to Pueblo IV (Dr. Richard Chapman, Principal Investigator).
- **July 2005:** Field archaeologist for the Maxwell Museum on the salvage excavation of eroded burials at Pottery Mound (LA 416) in Valencia County, NM. I excavated two Pueblo IV burials (Dr. Bruce Huckell, Director of the Maxwell Museum).

- **May 26-July 1, 2005:** Student volunteer for UNM on the Chaco Stratigraphy Program. This work involved re-excavation of the Judd trenches from the 1920s in the mounds south of Pueblo Bonito, Chaco Canyon, NM. My responsibilities included supervising the excavation of a large portion of the easternmost trench, total station mapping, laying the excavation grid, creation of a topographic map of the area south of Pueblo Bonito (29SJ387), and mapping a portion of Pueblo Del Arroyo in advance of Park Service renovations at the site (Dr. Wirt H. Wills and Dr. Patricia Crown, Principal Investigators).
- **Oct 4, 2004-March 2005:** Crew Chief for OCA on the continuation of the Camel Tracks Data Recovery Project near La Cienega, NM. I supervised the excavation of nine Pueblo IV field house sites on the Caja del Rio Plateau south of Santa Fe, as well as overseeing the total station mapping of the nine sites, conducting the faunal analysis, and authoring seven chapters of the excavation report (Dr. Patrick Hogan, Principal Investigator).
- **Sept 3-22, 2004:** Crew Chief for UNM on the Cabezon Testing Project. This work included supervision of test excavation of possible Paleoindian features discovered during pipeline construction. My responsibilities included overseeing the fieldwork, total station mapping of the site, as well as authoring the excavation report (Dr. Bruce Huckell, Principal Investigator).
- **June 1-Aug 26, 2004:** Crew Chief for OCA on the Alamogordo Flood Control Data Recovery Project. During this time I was responsible for supervising the excavation of a late Mesilla-El Paso phase Jornada Mogollon habitation site near Alamogordo, NM. I supervised the excavation of about 50 prehistoric features, four pit houses, and about 15 surface rooms, as well as all total station mapping (Janette Elyea, Project Director).
- **Oct 21, 2003-Jan 20, 2004:** Crew Chief for OCA on the Alameda Area D Data Recovery of cultural resources impacted by the construction of the North Valley Vacuum Sewer System in northwest Albuquerque, NM. My duties included supervising the excavation of a large historic settlement and early historic Hispanic cemetery, including devising excavation strategy, monitoring backhoe trenches, supervising the excavation of about 80 human burials and 70 historic features, and all of the total station mapping (Dr. Richard Chapman, Principal Investigator).
- **Sept 29-Oct 19, 2003:** Field archaeologist for OCA on a survey of Forest Service land northeast of Aztec, NM. My duties included walking transects, site photography, mapping with tape and compass, use of a Garmin GPS unit, in-field artifact analysis, and completing Laboratory of Anthropology site forms (David E. DeMar, Crew Chief).
- **Aug 4-Sept 24, 2003:** Field archaeologist for OCA on the Camel Tracks Data Recovery Project, excavating sites impacted by the development of a missile range near La Cienega, NM (south of Santa Fe). My duties included the excavation and documentation of four Pueblo IV field houses, several grid squares, several extramural features, and total station mapping of the sites (David E. DeMar, Crew Chief).
- **July 7-21, 2003:** Field archaeologist for OCA on the Fort Wingate Data Recovery Project, excavating prehistoric sites impacted by the construction of a school. During this time I participated on the excavation of two Pueblo II field houses (David E. DeMar, Crew Chief).

Crew Member

Envirosystems Management, Inc. | June 18-25, 2003

Crew member for Envirosystems Management, Inc. on a survey in the Cibola National Forest near Tajique, NM. My responsibilities included walking transects, use of a Garmin GPS unit, digital camera photography, mapping with tape and compass, and completing Laboratory of Anthropology site forms (Randy Fox, Crew Chief).

Crew Member

SWCA, Inc (Flagstaff Office) | April 8-June 1, 2003

Crew member for SWCA on the Navajo Route 27 Data Recovery Project. During this time I excavated and documented three Pueblo I pit houses and three human burials (Dennis Gilpin, Principal Investigator and Josh Edwards, Project Director).

Crew Chief

SWCA, Inc (Durango Office) | June 15-Nov 11, 2002

Crew Chief for SWCA on the Animas-La Plata Archaeological Project in Durango, CO. My responsibilities included the supervision of the excavation of seven prehistoric sites in Ridges Basin, CO, including two Pueblo I hamlets with multiple pit houses, surface structures, and extramural features, including human burials. I was responsible for devising excavation strategies, total station mapping, drafting the field maps, and instructing Native Americans in total station mapping (Randy Fox, Field Director).

Crew Member

San Juan County Museum Association, Division of Conservation Archaeology (DCA) | Feb 12-June 1, 2002

Crew member for DCA on a survey going from Fruitland, NM to Red Mesa, UT. During this time I walked transects, digital photography, site mapping with tape and compass, and filling out Laboratory of Anthropology and Navajo Nation site forms. I assisted with the write-up of the final report when the field work was over (Dana Robinson, Crew Chief).

Archaeological Monitor

QWEST Communications Corp. | Aug 13-Nov 17, 2001

Archaeological monitor for QWEST. During this time I did several jobs, including as a crew member on a pedestrian survey from Dunsmuir, CA to Hilt, OR. I wrote the report for this survey, the report of another survey from Roseville, CA to Reno, NV, and a report to the California Public Utilities Commission documenting QWEST's efforts to comply with California state laws (CEQA 1979) concerning the protection of cultural resources. I also acted as an archaeological monitor on a fiber optic upgrade project running from Redding to Dunsmuir, CA, observing all earth-moving activities and inspection of the ROW for previously undocumented archaeological sites (Cindy J Arrington, Project Director).

Archaeological Monitor

QWEST Communications Corp. | Jan 8-June 20, 2001

Archaeological monitor for QWEST on a fiber optic upgrade construction project running from El Centro, CA to Mesa, AZ. My responsibilities included monitoring all earth-moving activities and inspecting the ROW for any undocumented archaeological sites (Cindy J Arrington, Project Director).

Faunal Analyst

San Juan County Museum Association, Division of Conservation Archaeology (DCA) | April 2000

Faunal analyst for DCA examining animal remains recovered from the excavation of four Dinetah-Gobernador Phase Navajo sites near Aztec, NM. My work included examination of the bones to determine taxon, element, portion and side of element, age, sex, and cultural or post-depositional modification, as well as write-up of the analysis (Michael J Proper, Principal Investigator).

Faunal Analyst

Woods Canyon Archaeological Consultants | July 6, 1999-Mar 3, 2000

Faunal analyst for Woods Canyon. During this time I conducted the analysis of 22 zooarchaeological assemblages recovered during the excavation of archaeological sites impacted by construction of the Rocky Mountain Loop Pipeline. Although I also participated in the excavation of these sites, I conducted the faunal analyses on weekends, rain days, etc. Once the excavation phase was complete, I became the full-time faunal analyst, responsible for devising analytical methods and examining all non-human bone from the project (22 sites ranging in age from Archaic-Ancestral Puebloan-Navajo) in order to determine taxon, element, portion and side of the element, age, sex, and cultural or post-depositional modification. Also, I classified and described the bone tools recovered from this project and wrote a short synopsis of the archaeofaunas from each site (Jerry Fetterman and Linda Honeycutt, Principal Investigators).

Crew Member

Woods Canyon Archaeological Consultants | May 3-Nov 12, 1999

Crew member for Woods Canyon on the Rocky Mountain Loop Pipeline Data Recovery Project. This work consisted of the excavation of sites ranging in age from Archaic-Navajo impacted by the expansion of an existing natural gas pipeline running through San Juan County, NM and southwestern Colorado. During this time I participated in the excavation of three Pueblo I hamlets and two multi-component sites. I was responsible for excavating two Pueblo II pit houses, one Pueblo I pit house, several Pueblo I surface rooms, several Archaic features, a Pueblo I human burial, and the total station mapping of five archaeological sites (Jerry Fetterman and Linda Honeycutt, Principal Investigators).

Crew Member

La Plata Archaeological Consultants (LAC) | July 20, 1997-June 19, 1998

Crew member for LAC on the Alison CO2 Pipeline Data Recovery Project. This project consisted of the excavation of archaeological sites impacted by pipeline construction in the Middle Mesa/Francis Mesa/La Manga Canyon areas of San Juan County, NM. My responsibilities included the excavation of four Dinetah-Gobernador Phase Navajo hogans, a Pueblo I midden, several Pueblo I dog burials, auger testing, and total station mapping (Jim Kleidon, Crew Chief).

Field Archaeologist

Gemeente Nijmegen, the Netherlands | Aug 14-Dec 6, 1996

Field archaeologist for the City of Nijmegen (the Netherlands) excavating sites threatened by various construction projects. I worked on two sites on this project: Ulpia Noviomagus, a Roman city occupied during the 1st-4th centuries AD, and the Kelfkensbos, a multi-component site occupied continuously from the 1st century AD until it was abandoned in World War II. My responsibilities included the excavation and recording of two hand-excavated trenches into a 4th century Roman defensive ditch, the excavation of several medieval privies, a human burial, and numerous architectural and extramural features of various ages (Rob Reijnen and Kees Brok, Site Directors).

Volunteer Student Archaeologist

University of Aix-Marseille, France | June 15-July 24, 1996

Volunteer student archaeologist for l'Universite d'Aix-Marseille (France) on the excavation of Baume Moula-Guercy, a cave in Soyons France with a Middle Paleolithic/Neanderthal occupation. My work here included the excavation and documentation of a hearth dating to the Riss-Wurm interglacial (approximately 90,000 years BP) and assisting the Site Director in the identification of Neanderthal skeletal remains and Paleolithic fauna, both in the field and in the laboratory (Dr. Alban DeFleur, Site Director).

Crew Member

SWCA, Inc (Phoenix Office) | Mar 28-May 5, 1996

Crew member for SWCA on the Carlota Mine Data Recovery Project. This work consisted of the excavation of several Pre-Classic and Classic Hohokam pit house villages near Globe, AZ. My responsibilities included the excavation and recording of four Hohokam pit houses and several extramural features (Randy Fox, Crew Chief).

Assistant Crew Chief

Soil Systems, Inc. | May 10-Oct 22, 1995

Assistant Crew Chief for Soil Systems, Inc. on the continuation of the Ute Mountain Ute Irrigated Lands Archaeological Project. This work consisted of the excavation of seven large Ancestral Pueblo habitation sites in Cowboy Wash, CO (near Towaoc). During this time I participated in the excavation of four large multi-component prehistoric Pueblo villages, and my responsibilities included aiding the Crew Chief in devising excavation strategies, the supervision of crew members on the excavation of kivas, pit houses, surface rooms/extramural features, monitoring the mechanical trenching and site stripping by backhoe, conducting auger testing, and total station mapping. My work also included the excavation of two large Pueblo III kivas, a Pueblo II-III pit house/kiva, a small Pueblo II meal room/pit structure, several rooms in a Pueblo III room block, one human burial, and several extramural features (Dr. Brian Billman, Project Director).

Crew Chief

Louis Berger and Associates (Las Vegas, NV Office) | Dec 2, 1994-May 1, 1995,

Crew Chief for Louis Berger and Associates on test excavations at the Old Las Vegas Mormon Fort State Historic Park. The goal of this project was to determine the subsurface foundations of the historic fort and to identify how many components are present at the site. My responsibilities included devising excavation strategies, the supervision of archaeological technicians in grid square and feature excavation and description, establishing the site grid system, site mapping with transit, backhoe monitoring, and authoring a chapter on site geomorphology for the final excavation report (Dr. John Hohmann and Doug Loebig, Principal Investigators).

Crew Chief

Louis Berger and Associates (Las Vegas, NV Office) | Oct 11-Dec 2, 1994

Crew Chief for Louis Berger and Associates conducting background research for test excavations at the Old Las Vegas Mormon Fort State Historic Park. My responsibilities included historical background research of the site, the development of a soil description form and dictionary for the LBA Southwestern Regional Office, the development of an excavation and laboratory analysis paperwork system, and numerous other pre-excavation activities. I also conducted a faunal analysis of the animal remains from the Boulder Rock Shelter, a multi-component Archaic/Hohokam habitation site in southern Arizona (Dr. John Hohmann and Doug Loebig, Principal Investigators).

Crew Member

Western Cultural Resources Management (WCRM) | May 10-Oct 6, 1994

Crew member for WCRM on the Cripple Creek-Victor Gold Mine Company Cresson Project in Cripple Creek/Victor, CO. I participated on the excavation, survey and mapping of historic gold mine sites and associated settlements, and one prehistoric settlement. My responsibilities included the excavation of several houses/domestic structures, privies, and other historic features, as well as total station mapping. I spent the last two months on the project serving as the archaeological monitor inspecting the project ROW for right-of-way violations and looking for undiscovered cultural resources (Rick Morris, Principal Investigator).

Crew Member

Louis Berger and Associates (Phoenix Office) | Apr 15-May 6, 1994

Crew member for LBA on the excavation of a historic trash dump dating to the 1870s in the historic town of Sinclair, AZ (near Flagstaff). My responsibilities included the excavation of grid squares and analysis of the faunal remains from the site, as well as another faunal analysis of the animal remains from a limited excavation project undertaken at Homolovi (Dr. John Hohmann, Principal Investigator).

Crew Member

Archaeological Consulting Services | Nov 8, 1993-Feb 12, 1994

Crew member for ACS on the excavation of a historic Pima cemetery in Phoenix, AZ. During this time I was responsible for the excavation of 34 human burials dating from ca. 1880-1940 (Marjorie Green, Principal Investigator).

Crew Member

SWCA Inc. (Durango CO Office) | Aug 25-Oct 14, 1993

Crew member for SWCA on the excavation of Pueblo II and III Ancestral Pueblo settlements impacted by the construction of an irrigation canal in Cowboy Wash, CO (near Towaoc). My responsibilities included the excavation and description of a Pueblo III field house and several features, including one human burial (Ray Harriman and Roger Walkenhorst, Crew Chiefs).

Crew Member

Kinlani Archaeology | July 5-Aug 21, 1993

Crew member for Kinlani Archaeology on the excavation of a Pueblo II pit house hamlet near Sanders, AZ. My responsibilities included the excavation and documentation of a Pueblo II kiva/pit house and three Pueblo II infant burials (Deborah Dosh, Principal Investigator, and Doug Loebig, Crew Chief).

Crew Member

Western Cultural Resources Management (WCRM) | May 3-June 24, 1993

Crew member for WCRM on the continuation of the El Paso Natural Gas Pipeline Expansion Project near Tohatchi, NM. During this time I participated in the excavation of two large multi-component Ancestral Pueblo villages, responsible for the excavation and documentation of three Basketmaker III pit houses, a Pueblo I surface room, a turkey burial, and several extramural features (Randy Korgel and Doug Loebig, Crew Chiefs).

Crew Member

San Juan County Museum Association, Division of Conservation Archaeology (DCA) | Jan 13-Nov 23, 1992

Crew member for DCA on the excavation phase of the El Paso Natural Gas Pipeline Expansion Project near Tohatchi, NM. During this time I participated in the mitigation of two large multi-component Ancestral Pueblo villages, responsible for the excavation and documentation of two Basketmaker III pit houses, a Pueblo I pit house, a formal Pueblo II kiva, and nine human burials ranging in age from Basketmaker III to Pueblo II. I also assisted the Human Osteologist (Pilar Flores) in the analysis of some of the human remains recovered during the project (Bill Latady and Randy Korgel, Crew Chiefs).

Crew Member

Larson/Tibesar Associates | Sept 16-Nov 4, 1991

Crew member for Larson/Tibesar on two excavations: a late prehistoric bison jump near Gillette, WY and at Fort Abraham Lincoln, a US Cavalry fort in Mandan, ND. At the buffalo jump site I excavated grid squares in a large bed of bison bones and two tipi rings, and assisted in total station mapping. At Fort Abraham Lincoln I assisted in the excavation of a mess hall structure dating to the 1870s (Ross Hilman and Jeff Kinney, Crew Chiefs).

Senior Technician

Garrow and Associates | Mar 25-Sept 7, 1991

Senior Technician for Garrow and Associates on the testing and excavation phases of the Iroquois Gas Pipeline Project in central New York State. My work here included the testing of 16 prehistoric and historic sites, as well as the excavation of six prehistoric sites. Four of the excavated sites were Lamoka Phase Archaic camps, and the other two were large Late Woodland villages. My responsibilities included excavation of shovel tests, grid squares, and extramural features. I also spent a month in the lab assisting my Crew Chief (Mark Peterson) in report preparation and conducting phosphate tests on soil samples (Paul Webb, Principal Investigator).

Crew Member

University of Freiburg (Germany) | Sept 6-Oct 12, 1990

Crew member for the University of Freiburg on the excavation of a Roman auxiliary fort/road station near Ulm, Germany. On this project I participated in the excavation of the largest Roman cellar north of the Alps, a bath complex, and 26 human cremation burials (Dr. Hans Nuber, Site Director).

Osteologist/Lab Technician

Laboratory for Human Osteology, University of Alabama | Dec 3, 1989-Aug 25, 1990

Osteologist/Lab Technician for the University of Alabama responsible for processing osteological material (both human and animal) from the Fusihatchee Site (1Ee191). This site was a large prehistoric/protohistoric Creek settlement near Montgomery, AL, and the project was funded by the National Science Foundation (Grant No. BNS-8718934). In addition to the work with the Fusihatchee material, I co-authored (along with Dr. Ken Turner) an analysis of 48 burials from the Bridgeport Site, a Late Woodland-Early Mississippian village in northern Alabama. My responsibilities for this analysis included determination of age, sex, and stature, as well as examining the skeletons for pathologies (Dr. Kenneth Turner, Laboratory Director).

Student Fieldworker

The University of Alabama | Aug 28-Dec 1, 1989

Field school participant on the excavation of an exploratory trench into Mound Q, a Mississippian platform mound at the Moundville complex south of Tuscaloosa, AL (Dr. V James Knight, Principal Investigator).

Archaeological Aide I

Office of Archaeological Research, University of Alabama (OAR) | Nov 12-Dec 30, 1987

Archaeological Aide I for OAR on the Elko Switch Cemetery (1Ma305). This project consisted of the excavation of 56 historic human burials dating from ca, 1850-1920, prior to the construction of an exit ramp of I565 in Huntsville, AL. My responsibilities included the excavation and documentation of 12 human burials (Tim Mistovich, Principal Investigator).

Laboratory Technician

Coconino National Forest | Aug 16-Oct 17, 1987

Laboratory technician (GS-3) for the US Forest Service at the Coconino National Forest. My responsibilities included processing artifacts from excavations at Elden Pueblo (NA142), a large prehistoric Sinaguan settlement near Flagstaff, AZ (Peter Pilles, Jr., Coconino National Forest Archaeologist).

Volunteer Crew Member

Coconino National Forest | July 15-Aug 15, 1987

Volunteer crew member for the Coconino National Forest on the excavation of Elden Pueblo (NA142), a large prehistoric Sinaguan settlement near Flagstaff, AZ. My responsibilities included the excavation of a series of grid squares in a midden at the site, as well as several rooms in the main pueblo area. I assisted in the excavation of two human burials and a hand-dug trench in the main communal structure at the site (Peter Pilles, Jr. Coconino National Forest Archaeologist).

Archaeological Aide I

Office of Archaeological Research, University of Alabama (OAR) | April 4-May 27, 1987

Archaeological Aide I for OAR on the Alabama Pipeline Survey, which consisted of surveying and testing of archaeological sites from Butler to Mobile, AL in advance of pipeline construction. My responsibilities included walking transects, excavating shovel tests, site recording and mapping with tape and compass, and the excavation of 1 x 2 meter test units (Tim Mistovich, Principal Investigator).

Archaeological Aide I

Office of Archaeological Research, University of Alabama (OAR) | Mar 3-April 2, 1987

Archaeological Aide I for OAR on the excavation of the Mill Creek Site (1Tu265), a transitional Late Woodland (West Jefferson Phase)-Mississippian (Early Moundville I Sub-Phase) hamlet located on the Black Warrior River in Northport, AL. My responsibilities included the excavation of house/structural features, extramural pit features, and grid squares (Tim Mistovich, Principal Investigator).

Archaeological Aide I

Office of Archaeological Research, University of Alabama (OAR) | Feb 14-Mar 1, 1987

Archaeological Aide I for OAR on the survey and testing of archaeological resources on Tennessee Valley Authority property in the Pickwick Basin of northwestern Alabama-southwest Tennessee. My responsibilities included walking transects, site recording and mapping with tape and compass, and excavation of 1 x 1 meter test squares (Carey Oakley, Principal Investigator).

Archaeological Aide I

Office of Archaeological Research, University of Alabama (OAR) | Jan 3-Feb 12, 1987

Archaeological Aide I for OAR on the testing of a protohistoric Mississippian settlement in Cahaba, AL. My work included the excavation of architectural features of the first state capitol of Alabama, as well as several grid squares in the Mississippian component (Dr. V James Knight, Principal Investigator).

Archaeological Aide I

Office of Archaeological Research, University of Alabama (OAR) | Dec 1986-Jan 1, 1987

Archaeological Aide I for OAR processing artifacts and materials from excavations at sites 1Ma50 and 1Ma141 (Eugene Futato, Laboratory Director).

Archaeological Aide I

Office of Archaeological Research, University of Alabama (OAR) | Aug 24-Dec 23, 1986

Archaeological Aide I for OAR on the excavation of a Middle Woodland multi-stage mound at the Walling Site (1Ma50) and a stratified transitional Archaic habitation-Early Woodland shell midden (1Ma141) outside Huntsville, AL. My work here included feature and grid square excavation, and drawing plan and profile maps (Dr. V James Knight, Principal Investigator).

Crew Member

Oakley Solis Mistovich Archaeological Consultants (OSM) | Aug 2-22, 1986

Crew member for OSM on the testing of Archaic features along the Tennessee River near Huntsville, AL. My work included the excavation and documentation of an Early Archaic hearth and several grid squares in a Middle Woodland shell midden (Carey Oakley, Principal Investigator).

Volunteer Crew Member

University of Caen, France | June 10-July 31, 1986

Volunteer crew member for the excavation of a medieval chateau burned by the English during the Hundred Years War (Saint-Vaast-sur-Seulles, Normandy, France). I participated in the excavation of a kitchen floor and several other structures, as well as assisting in mapping large profiles of different segments of the chateau (Dr. Joseph Decaens, Site Director).

Volunteer Crew Member

Office of Archaeological Research, University of Alabama (OAR) | Jan 2-31, 1986

Volunteer crew member for OAR on the survey and testing of Tennessee Valley Authority property in the Pickwick Basin of northwestern Alabama/southwestern Tennessee. My work included walking transects, recording and mapping sites with tape and compass, and 1 x 1 meter test square excavation (Carlos Solis, Principal Investigator).

Archaeological Aide I

Office of Archaeological Research, University of Alabama (OAR) | Nov 29-Dec 17, 1985
